1 - 13 August

Summer Workshop in Compuational Design

Introduction:
For a successful architectural project, the efficiency of design communication and the control of information flow are as important as the creativity of ideas. In response to the concurrent digital evolutions emerging in the architectural industry worldwide, the Faculty of Architecture at The University of Hong Kong will host a two week intensive summer program named Digital Practice.

Highlights:
The program is divided into Basic Level and Advanced Level for the use of computational software. Computational tools to be taught include Rhino Scripting, Grasshopper and Digital Project. Design control through applications of Building Information Modelling.

Application:
Deadline for registration is July 15, 2011. Online registration is required. Please go to http://fac.arch.hku.hk/summer/hk/dp for details and application forms.

Fees:
Part 1: $3,900 HKD for 1 - 6 August 2011 (Basic Course)
Part 2: $3,900 HKD for 8 - 13 August 2011 (Advanced Course)
Part 1 & 2: $7,500 HKD for 1 - 13 August 2011 (Entire Course)

The fee for the program does not include lights or accommodation. Accommodation can be arranged at a cost at an affordable hotel near The University of Hong Kong.

Questions and applications should be sent to: dpprog@arch.hku.hk.
