

Potential Development of 3D Printing in Architecture Industry

Among architects 3D printing has become more and more popular over the last few years. Although a 3D printer is not to be expected in every architects' office yet, that will change soon given the enormous rate of adoption in this field. Architects use desktop 3D printing to research shapes in practise and to make scale models to convince clients.

The design process in which architects are involved takes a lot of time and is often very stressful, handmade styrofoam scale models are a waste of precious time. To save some of their valuable time, many architects already adopted 3D printing into their design process, the emergence of affordable desktop 3D printers made this possible.

Seminar Detail

Venue : Hong Kong Productivity Council,
78 Tat Chee Avenue, Kowloon, Hong Kong

Time : 2:00 p.m. - 8/6/2015
(Arrived 10 minute earlier for registration)

Language : Cantonese & English

Target : Architecture Industry related engineer,

Audience: designer, manager etc

Fee : Free

Contact: Mr. Chau
T: 2788 5625 E: chrischau@hkpc.org
Mr. Fung
T: 2788 5590 E: chuckfung@hkpc.org

Please fax the completed form to 2788 6338 for seat reservation.

Time	Content	Speaker
14:00 - 15:00	Future trending 3D printing technology and application - New 3D printing materials: Gold - 4D printer - Drone 3D scanner	Mr. Chuck Fung Mr. Raymond Sin
15:00 - 16:00	The impact of 3D printing on architecture	Mr. Romain Kidd (CEO of iMakr Group)
16:00 - 16:15	Break	/
16:15 - 17:30	New Business Model in Nowadays 3D printing technology - Cost estimating in project development - Mobile 3D printing service - Local government funding support in 3D printing technology	Mr. Chuck Fung
17:30 - 18:00	Q & A session	/

Enrolment Form

Please fax your completed form to 2788 6338 or email to chrischau@hkpc.org for seat reservation
