

The Hong Kong Institute of Architects Third Quarterly General Meeting 2020

**Guest Speaker - Mr. WONG Kam Sing, GBS, JP, Secretary for the Environment,
Environment Bureau of HKSARG**

Additional Information on Environment from Environment Bureau

1. Waste Reduction

Waste reduction at source is one of the keys in meeting the challenges for environment in Hong Kong. In this regard, we have already published the "Green Event Guidebook"

(https://www.wastereduction.gov.hk/sites/default/files/GreenEvent_Guidebook_Eng_201801.pdf) to encourage event organisers to integrate elements of waste reduction at an early stage of event preparation. We will introduce the municipal solid waste charge scheme to enhance waste reduction in the entire community.
