## **Candidate's personal statement:**

Since my days in the university, I have been involving in community works in relation to architecture, society and education. It has been over 20 years now. I wish I could contribute more to the Institute by bringing more synergy between architecture and education to the society. Similar to a few US and Scandinavian models, I wish the architectural design topics could be further promoted and implemented into the public education system including the secondary and primary school levels. On the other hand, I wish some innovative pedagogical models could be promoted and implemented into institutional architecture.

I was awarded as the winner of the Young Architect Award 2009, and then the '40 under 40' Award in 2012 and the Hong Kong Youth Service Award in 2014. In 2017 & 2019, I received the DFA Design For Asia Awards (Silver & Bronze), the HKIA Cross Strait Architectural Design Awards (Nominated Award), the A&D Trophy Awards and A&D China Awards (Best of Category) for the design projects done for a NGO to promote innovative education to the community.

I was the Senior Associate of Aedas which I have worked there from 2005 to 2013. I was involved as a key design/ execution role in many significant projects locally and globally including Europe, Middle East and Asia. After that, I joined the Hong Kong Design Institute as the Senior Lecturer until now. I hope my hybrid experience between the practical projects and the pedagogical world can be of service to the Institute.
