- Works Committee and Member of Wai Ji Christian Service since 2018 on services centre improvement works

Candidate's personal statement:

With diverse range of local project experience at international architectural practice particularly passionate in delivering high quality project with innovative and practical design solutions, passionate in serving the community by professional knowledge, and engaging in activities related to professional development of young generations.

Since 2017 I have been working together with Committee members to uphold the architects' leading role and promote the architectural excellence - by establishing HKIA BIM Accreditation Programme, organizing BIM trainings for architects, and by actively participating in external bodies to ensure architects stay influential in shaping the industry BIM standard/training and driving the DfMA adoption. During these involvements I realize that more challenges will be aroused to our Members' practice on various aspects (skillset, methodology, scope, contractual issue etc.) to adapt the global trends in digitalization and Government's initiation on construction innovation & technology. Architect's proactive involvement at this implementation stage is crucial to uphold our leading role in the industry. Therefore, I decide to submit my nomination as Council Member to continue tackle the challenges, together with Team UP, for our profession.

The adoption of innovation & technology on design and construction process shall be progressive and also a unique solution which suits the local practice and be able to maintain the design flexibility and quality of architecture in Hong Kong. I am committed to achieve by bridging dialogues between our young members, young practices, veteran members, other professional institutes and government bodies to facilitate awareness of latest building practices; sharing of challenges, experience and foresight; acquisition of comprehensive professional/practicing knowledge; and reflection of views of architectural profession to government – These dialogues would assist Institute to establish a future vision and road map of our profession, which is crucial for young generation, and to derive plans and trainings to accomplish it progressively.

In recent years I have also been involving in community engaging volunteer works particularly helping the socially vulnerable groups to improve their living conditions. As architects we designed for the community, shaped the community with understanding and care of their needs - The Institute can take lead on more engaging activities to serve the community with our professional knowledge, to establish trust with community stakeholders, and to contribute an environmentally and economically sustainable future.
