## **Candidate’s personal statement:**

Let’s rethink how we architects can gather greater strength under this challenging environments to transform crises into opportunities for our own profession as well as for the greater good of the Hong Kong society.

Collectively, we need to have a comprehensive understanding of architectural projects and practices from local and in mainland; and maintain a close collaboration with the international architectural arena. We should not only emphasize on practice, but also to focus on ideas exploration and innovation.

### My Belief

To drive for positive social changes through Design, Professionalism and Empowerment. I have served the Institute in various taskforces/ committees/ boards/ Council and now a serving Council member. If I am elected as a council member of the institute, I shall focus on the following major issues:

1. To strive for more resources to support members’ pursuit of new knowledge in better making and implementing designs. To un-tie the “old knot of resources.
2. To promote architectural design competitions locally, as well as encourage members to participate in local and overseas architectural design competitions and exhibitions to showcase our creativity.
3. To uphold our core values as an open, fair and transparent platform.
4. To engage our young fellow members to discuss their participation and way forward to the governance of HKIA.
5. To elevate the architect’s image and status.
6. To contribute to the development of high quality socially sustainable architecture for all to use.
7. To raise awareness of the architect’s responsibility to ensure that social inclusion and access to the built environment are integral to the architectural design, construction and education process.

I look forward to your continuous support to the Institute.
