- Exhibitor, 2013, HKIA REVEAL exhibition, ArtisTree, HK.

Candidate's personal statement:

Architect contributes to society in two ways. Firstly, by making good architecture and public spaces for enrichment of livability and sustainability. Secondly, by educating good designers and promote innovation. Such belief has guided my professional development and pursuit. I am both practitioner and educator. I promote architecture by designing, exhibiting, writing as outreach, and engaging communities. These endeavors included publicizing ongoing research topic on Inclusive Innovation & Growth; ‘Urban Mobility & Smart Infrastructure’, Co-Curating the HK-SZ Biennale 2017; Facilitating dialogue between professionals and academia at various cross disciplinary platforms and especially among young members.

I believe in human-centric design promotes inclusive communities – Architects play an important role within the built environment, in order to bridge boundaries between professionals and local stakeholders... I believe my skills and experience can be a positive addition to the coming council if I am being elected.

VISION Statement

1. Raise HKIA profile – by engaging the community through more outreach activities.
2. Establish Collaborations – Advocate/ Strengthen public/ private/ NGO and other professional institutes and academic collaborations - to bring academia and practitioners closer together.
3. Rethink Opportunities – Advocate to rethink development opportunities and existing overlooked infrastructure to strike a balanced development
4. Strengthen Design & Technology – strengthen CPD topics in this area as construction development & innovation is constantly affecting the way we design our future way of living. We need to integrate this to achieve sustainable design (SDG Goals) for our future environment.
5. Help Upcoming Generation - Advocate govt. to do more in conducting competition for small practices & collaborations at different levels.
