Candidate's Statement

CANDIDATE'S PERSONAL STATEMENT

**“As a profession of Architects,
WE must collaborate and work together to face the challenges and opportunities to come.”**

The World and our City have changed drastically in the recent years. COVID has brought forth significant impact to the way we live, the way we work. This major paradigm shift is affecting not only individuals, but also to us, collectively as a Profession. Our City has lost the population of 1.6%. We are in acute shortage of affordable housing. The new conditions of our City and the World bring to us **New Challenges** and at the same time **New Possibilities**.

In order to capture these opportunities and overcome the challenges, we must collaborate and work together under the guidance of our **Collective Wisdom** and a **Concerted Effort** for a sustainable future both for our Profession and this Planet.

I view the following tasks important to us as a Professional body in the immediate time:
We must work for a **Sustainable Business Environment** for all bands of practices, so that we can work on sufficiency to offer our quality professional service. The phenomenon of Fee Diving is damaging to our Profession, also to our City.

Strengthen the Bonding within the Registered Practices.
Promote the practice of **Green Architecture** towards the New Zero Carbon direction.
Collaborate with other Institutes, Professions, the Community, and the Government to the direction of making HK to a '**Healthy City**'.

Create opportunities and support the growth of our Fellow **Young Architects** and **Young Practices**. i.e. Architecture Design Competitions.
Propose to the government the setting up of a Biennial **Hong Kong Festival of Architecture**, as new a cultural spear in Asia.

Sharpen up our **CEPD** to elevate our knowledge, skill, and competitiveness.
Enhance the Presence and Value of Architects in Society, **Architects' Voice and Influence** to Government Policy concerning, Architecture, Planning and Housing.
Architecture to participate as part of the Building Industry, also as **Cultural, Creative, and Innovative** assets of the City.

Setting up of **Strategic Planning** pathway in the coming 5 to 10 years.
This is a time that allows no room for us to disintegrate within ourselves. We must stand side by side with each others to face the challenging time to come.
