HK Countryside Foundation Ltd., Director	2018-present
Canadian International School of Hong Kong	
CDNIS Premises Committee, Committee member	2019-present

Personal Statement:

I joined HKIA Green Tour 2002 to attend Sustainable Building Conference and visited green buildings in Scandinavia. It was my start to aware of Climate Change and learnt why Architects have to participate in the green building design. Then I joined Environment and Sustainable Development Committee till now. For the past years, I helped to organize several green tours, to attend the different Sustainable Conferences and visited green buildings in different countries for learning.

Through the participation and involvement of the related activities and promotion work in HKIA, I truly believe that it can help more members to know the updated related green policies, green and sustainable building design knowledge and more. Hence, as the Chairlady of E&SDC this year, i had organized different Webinars on various green related topics, and co-organize with different organizations and hope to spread the green knowledge and messages—Architects have the responsibility and ability to combat Climate Change!

Carbon Neutrality road map is set in China and Hong Kong already. Through the participation of Council Work, I believe I can dedicate myself to work more for our members and our city on sustainable built environment and architecture towards Carbon Neutrality goal.
