CANDIDATE'S PERSONAL STATEMENT

I would like to argue that Architect contributes to society in two ways. Firstly, by making good architecture for enrichment of livability and nourishment of culture. Secondly, by educating good designers. Such belief has guided my professional development and pursuit. I am both practitioner and educator. I promote architecture by designing, exhibiting, writing as outreach, and engaging cross-discipline platforms. These endeavours included --the work done closely with the HKIA board of educational affairs and the secretariat team together with current OB/council members (please see the prev. page).

"Ongoing" Endeavour Statement:

1. Raise HKIA profile – by engaging the community through more outreach activities – Secondary School and University Levels.
2. Establish Collaborations – Advocate/ Strengthen public/ private/ NGO and other professional institutes and academic collaborations - to bring academia and practitioners closer together.
3. Friendship Network – increase resources for recreational activities & informal functions.
4. Rethink Opportunities – Advocate to optimize development density and infrastructure to strike a balance development; e.g. to up zone underutilized areas to increase land supply/ housing opportunities.
5. Engage in ARCHITECTURE DESIGN & INNOVATION Initiatives - go beyond boundaries to embrace the opportunities in the APAC region, as well as new development areas in HK. e.g. Set up "Pilot case" to test feasibility and innovative technology.
6. Strengthen Green Design & Technology – strengthen CPD topics in this area as development & innovation is constantly affecting the way we design our future way of living. We need to integrate this to achieve sustainable design.
7. Help Upcoming Generation - by setting up CPD online seminar with trending topics and interest sharing platform
8. Increase Research funding opportunities + exposure
9. Advocate govt. to do more in conducting quality design assurance in public works
