### **Election Statement**

Undergoing the pandemic situation in the recent years, our Institute is facing various challenges to be tackled. The unhealthy fee bidding environment, labour shortage and job opportunities mismatching, the establishment of new legislations, complicated approval procedures, inclusion of technological innovations, etc. all require our members and practices closely work together to obtain the most optimal and beneficial solutions to our Institute.

At the same time, in this new era of big data, the changing demographics of our Institute calls for our prompt action to review our setups to suit the new normal. By the completion of our premises renovation and the website revamp, we are expecting our Institute to be more open, more transparent and more inclusive. Let's work together. BE INCLUSIVE!
