CANDIDATE'S PERSONAL STATEMENT

STRONGER TOGETHER

Improve our ECOSYSTEM at work

I appeal for your support to address the dire situation now, across large, medium and small firms – to join hands to re-establish a more HEALTHY and sustainable working environment.

- We need to unite and liaise with government for FAIR support, FAIR treatment, REASONABLE timeframe for certain works etc.
- We are overwhelmed by the ongoing new services required, but with the same fee system/ arrangements.
- We need to address the lack of people in the market services, in order to address the dwindling manpower resources due to various reasons (i.e. people immigrating, govt competing resources, people retiring, industry not training people with good BIM skill sets fast enough etc.)
- Overwhelmed by different forces at work and pressure, we became slaves to the towering work.
- We need to unite to bring back our PRIDE & DIGNITY.

B. ENGAGE our Community at play

- Make HKIA relevant to the Society
- Raise the profile of our profession
- Demonstrate our abilities in terms of how what architects are capable of
- Increase & share our fellow members' knowledge
- Bring back building tours for professionals, network events...
- Collaborate with different organisations on relevant programs
- Make our voice heard in the Community!

I appeal for your support to improve the ECOSYSTEM at work for the betterment of our profession; & ENGAGE our community to make our voice heard, to regain & establish our pride and dignity for our profession. I hope together with my experience in “Architecture”, “Transport”, “Planning”; administration skills & various network build over the years, we can join hands to achieve these aspirations!
